1. Applicant's election with traverse of Group III, claims 39-59, 61-63 and 73-81 in Paper No. 9 is acknowledged. The traversal is on the ground(s) that the examiner never argued that the two species require separate searches and absent the need for separate searches, there is no logical reason to separate examination of the claims. This is not found persuasive because the previous examiner indicated that the claims directed to each species were classified in separate areas and thus would require separate searches.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 64-72 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9.

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

4. The abstract of the disclosure is objected to because it contains language which may be implied (i.e. "This invention relates generally to..."). Correction is required. See MPEP § 608.01(b).

5. Claims 39-59, 61-63 and 73-81 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the production of aluminum oxide ceramics, does not reasonably provide enablement for the process as generically claimed. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

6. Claims 39-59, 61-63 and 73-81 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 39 is indefinite in that the preamble refers to "ceramic bodies" while the body of the claim recites "firing the dried nano-particles" but makes no mention of the formation of ceramic bodies. Note that claim 81 also recites "further comprising cooling the nano-particles".

Claim 39 is indefinite in that the terminology is inconsistent. Claim 39 uses both "nanoparticles" and "nano-particles". The claim should be amended so that it is consistent throughout. Note that these terms are also used in other claims.

In claim 41, the phrase "the ceramic body" has no antecedent basis.

In claim 59, the phrase "the ceramic body" has no antecedent basis.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
